

Stream No. 12 (1 notice) McLeod Harbor, Montague Island.
Is 27 feet wide and 10 inches deep, and a few minor issues.
Has a fine gravel bottom. Clear water. Accessible for a half mile or more.

On August 3, 1925, there were no fish of any kind visible in streams or bay either.

Aug. 3, 1924, the head of bay had at least 50,000 fish. Did not examine the stream.

Aug. 18, 1924, lots of fish in streams, also in bay near streams.

Aug. 10, 1925, a few fish in stream.

Aug. 1, 1926: 1,000 fish.

Sept. 4, 1927: 6,400 fish.

Stream No. 13 (2 notices) Montgomery Bay, Latouche Island.

At lagoon outlet is 12 feet wide and 6 inches deep. Includes all waters.

South one has a fine gravel bottom and is accessible about 1/2 mile. There are three small issues puts into the lagoon. They are all short, but have good bottom.

September 19, 1926: Evidence to justify an estimate of 5,000 fish.

Aug. 22, 1927: 5,000 fish.

Stream No. 14 (2 notices) Next bay north.

First stream south side of bay is 4 feet wide and 3 inches deep. Coarse gravel bottom, small lagoon.

Next one is S.E. corner.

Is 12 feet wide and 4 inches deep.

The tide goes up to a falls 30 feet high.

At half tide there is 1,000 feet of stream. Upper end rough rocks; lower and coarse gravel.

Another at the N.W. corner is 6 feet wide and 4 inches deep. The bottom here is rough rocks with some fine gravel mixed. It is about 1/2 mile long ending at a small lake covering an area of 7 or 8 acres. The lake has a dirty bottom and water lilies, with the exception of one place where a small stream enters it. There were 75 silvers there. The 3 streams are good for 5,000 fish. (Visit Sept. 19, 1926)

August 22, 1927: 6,300 fish.

Stream No. 15 (No notice) Wilson Bay, Latouche Island.

North stream 6 feet wide and 3 inches deep.

Accessible 400 feet above mean high tide. Rough, rocky bottom,
